Carbon One Green

10-0-11

Guaranteed analysis

Total Nitrogen (N) .......................................................... 10%

  5% Urea Nitrogen

  5% Water Soluble Nitrogen*

Soluble Potash (K2O) .................................................... 1%

Derived from:

Urea, polymethylene urea, methylene diurea, monomethylol urea and potassium carbonate.

*6% Slowly available nitrogen from polymethylene urea, methylene diurea, an monomethyl urea.

General Application Instructions

Minimum dilution rate - 1:20 mix C1G to water.

2-3 gallons per acre foliar, 2-3 times per year.

Recommended use when temperature is above 70 degrees.

For crop specific recommendations contact distributor.
