Carbon One

3-2-2+1%S

Guaranteed analysis

- Total Nitrogen (N) .................................................. 3%
- Available Phosphoric Acid (P₂O₅) .......................... 2%
- Soluble Potash (K₂O) ........................................... 2%
- Sulfur (S) ............................................................... 1%
- 1% Combined Sulfur (S)

Derived from:
Urea, orthophosphate, potassium hydroxide, sulfuric acid

General Application Instructions

Minimum dilution rate - 1:20 mix C1 to water.

Fruit Crops
3 Gallons - early spring
2 Gallons - 14 days later
2 gallons - post harvest
2 gallons - 14 days later

Row Crops
3 Gallons - planting
2 Gallons - emergence
3 gallons - 10 days prior to bloom
2 gallons - bulking

For crop specific recommendations contact distributor.
Maximum application 20 gallons per acre per season.
